

ADVANCED POST-PROCESSING SOFTWARE

VERSION 2.0.0

RELEASE NOTES

These Release Notes cover known issues. Please read these notes carefully before installing the software.

WHAT'S NEW

- Support new Bing map version
- Air and land tutorials updated.
- Hydro tutorial added.
- Improve Optimized algorithm processing time.
- Support Hydrins equipment.
- Support all Septentrio receivers.
- 2D view added
- External GPS from NMEA sentences supported
- New tool to compute and display trajectory separation.
- New tool to compute statistics.

KNOWN ISSUES

- The 'horizontal view all' does not work properly:

When a new time view is opened the 'horizontal view all' command change the time scale to the whole period of the Xpf file, not only the period covered by the displayed data. It can be confusing for the user.
